

## Plaster and Render Beads

Beads that are designed to give true corners and edges to plaster and render where thick or 'rough' coats are required. Fixing is easy using plaster dabs or galvanised nails (with galvanised beads) and the mesh wings provide resistance to cracking while offering a good key to the plaster or render.

## GJAB Galvanised Wide Angle Bead 63mm Wing

A traditional wet plaster bead which provides a strong true corner or arris to protect the plaster edge, with the wide 63mm wings allowing for a good plaster key and resistance to cracking in uneven corners and to allow for a slightly deeper coat up to 20mm depth. Fixed by plaster dabs, grab adhesive or galvanised nails/screws with washer at maximum 600mm centres. Push the wing in further to the background to achieve the desired plaster depth up to a maximum of 20mm then ensure the nose is set square and plumb as required. Internal use only. Beads can be cut to size as required using tin-snips and/or a hacksaw. The large diamond of the expanded metal wings provide a suitable key to prevent cracking. Avoid damage to bead and coating when trowelling.

<b>Standard:</b>	BS EN13658-1:2005
<b>Material:</b>	Galvanised mild steel DX51D+Z275 (275g/m <sup>2</sup> zinc coating)
<b>Material gauge:</b>	0.4mm
<b>Reaction to fire:</b>	Class A1

Code	Size	Per Box	Weight
GJAB24	2.4m x 63mm wing	50 lengths	17kgs
GJAB30	3.0m x 63mm wing	50 lengths	21.5kgs

Goods to be stored and transported laying down and in dry conditions.  
Please dispose or recycle in accordance with waste management regulations.

### COSHH & Health & Safety.

Contains no substances hazardous to health. The comparative rough surface finish and sharp edges of expanded metal requires care when handling manually, to avoid risk of cuts and abrasions gloves should be worn.
