

TLPMB PVC-u Movement Bead

Data sheet

Issue Date:
March 2026

PVC-u Beads

PVC-u beads are now being used more and more, particularly in areas of high rainfall or extreme damp conditions. They provide an economical alternative to stainless steel products and are used in the same way as normal galvanised or stainless steel beads. They are manufactured from white high density polyvinylchloride high impact window grade material. Other colours are available and manufactured to order. The face of the bead is ribbed and perforated to produce a good plaster or mortar key and can be easily cut to size using a hacksaw.

TLPMB PVC-u Movement Bead

Designed to form a movement joint where needed in a long run of plastered or rendered masonry where there is a movement joint or to allow for thermal or differential movement in a long run of plaster or render. The bead consists of two plaster stop beads joined with a white extrusion allowing for approximately 4mm of movement when installed vertically. Internal and external use.

Benefits

- Simple installation (with plaster dabs or appropriate fixings)
- Easy to cut (by use of tin snips or fine tooth saw)
- Cost effective
- Non corrosive

Standard: Meets the equivalent standards required for metal bead to BS EN 13658-2:2005

Material: Exterior grade impact resistant UV stable unplasticized PVC-u

Code	Size	Per Box	Weight
TLP06MB25	2.5m x 6mm x 68mm wing	25 lengths	6kgs
TLP10MB25	2.5m x 10mm x 68mm wing	25 lengths	7kgs
TLP15MB25	2.5m x 15mm x 68mm wing	25 lengths	8kgs
TLP20MB25	2.5m x 20mm x 68mm wing	25 lengths	10kgs

Goods to be stored and transported laying down and in dry conditions.

Please dispose or recycle in accordance with waste management regulations.

COSHH & Health & Safety.

Contains no substances hazardous to health. The comparative rough surface finish and sharp edges requires care when handling manually, to avoid risk of cuts and abrasions gloves should be worn.
